

FORWARD EASTTM

**MAKES ANY SOFTWARE
RUN UP TO 10 TIMES FASTER!**

Mark Williams Company

FAST FORWARD™

THE SOFTWARE UTILITY THAT MAKES ANY SOFTWARE RUN UP TO 10 TIMES FASTER!

Wish your computer could run faster? With Fast Forward it can! And without expensive hardware or complicated installation. Fast Forward is a software utility that makes all your software programs run up to 10 times faster.

How does Fast Forward perform its magic? By taking advantage of RAM, your computer's high-speed internal memory. And bypassing the slow disk drive. Data is retrieved from your disk drive as you use it, then retained internally in RAM. The next time you need it—there it is—instantly available! No more waiting for tedious searches through your disk drive.

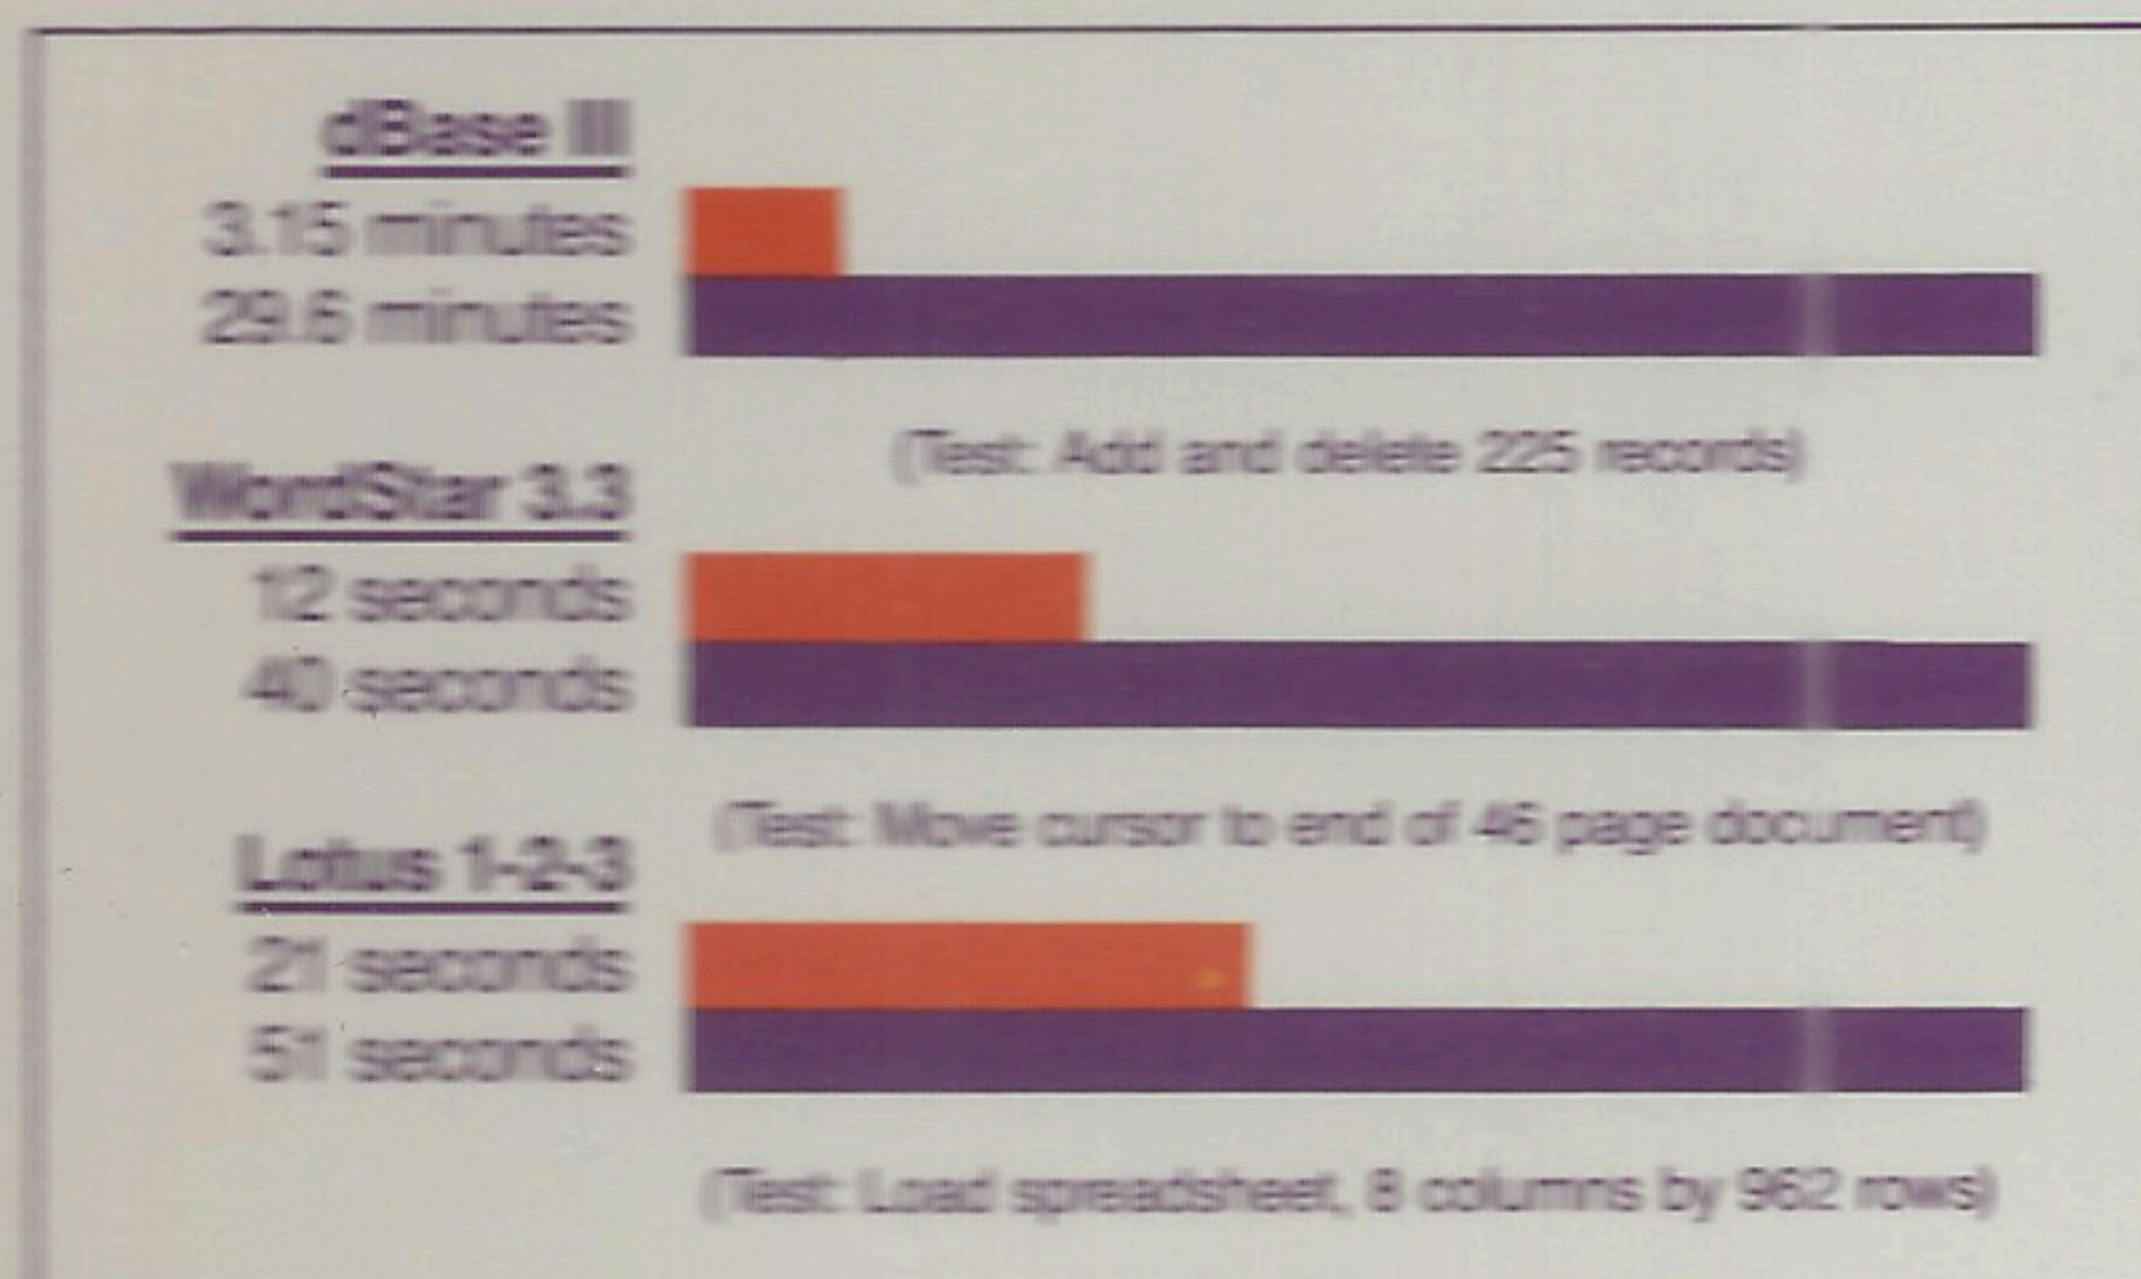

Fast Forward is another quality software product from the Mark Williams Company, makers of best selling programmers' tools since 1976.

FAST FORWARD PERFORMANCE

Programs that require frequent disk access will show amazing improvements. No more doodling while your database goes digging. Or lollygagging while your spreadsheet loads. See how much more you and your computer can produce with Fast Forward:

FAST FORWARD PERFORMANCE

■ With Fast Forward ■ Without Fast Forward

All tests done on 640K IBM PC, 20 megabyte hard disk and floppy drive. 320K RAM allocated to Fast Forward.

FEATURES

- Makes any software run up to 10 times faster
- The more you use it, the more data goes into RAM and the faster you go
- No expensive hardware or complicated installation
- Completely invisible to user
- Lets you choose how data will be saved
 1. Super fast: saves data to RAM
 2. Super safe: saves data to disk
 3. Safe and fast: saves data to RAM with automatic disk updates
- Lets you decide how much RAM to use (up to 1.5 Mb)
- Works with expanded memory boards (EMS compatible)
- RAM resident
 1. Works with major RAM resident programs
 2. Loads in any order
 3. Unloads with one command
 4. Lets you change the hot-key
- Includes online help screens
- Turns on and off for specific applications
- Can be called from command files
- Not copy-protected
- 60 day money back guarantee

1430 West Wrightwood, Chicago, Illinois 60614

Fast Forward runs on IBM PCs and compatibles with MS-DOS 2.0 or greater. Fast Forward requires 512K RAM and one floppy drive.
