Dear PC User:

Congratulations on your purchase of **Fast Forward** for the IBM PC and 100% compatibles. We're certain it will make your computer time more efficient and productive.

Please be sure to return your registration card to qualify for continuing support from Mark Williams. We'll notify you when updates become available and keep you informed about new products. There's also a space on this card for you to tell us how you heard about us. This information will help us spend less money on advertising and more on product development to benefit *you*, our valued customer.

Mark Williams now offers on-line technical support via BIX (Byte's Electronic Information Exchange). Users who subscribe to BIX enjoy many benefits: direct access to our technical staff, ongoing discussions on a variety of topics, and the opportunity to share information with a network of experienced users. We're even offering a \$10.00 discount on your BIX registration fee to get you started. If you would like to know more about BIX, just read through the enclosed brochure.

If you're interested in programming in C, you'll be happy to learn about **Let's C**. It compiles more quickly than ever, produces fast, compact code, and provides a complete development environment -- all for only \$75.00. Mark Williams also offers the revolutionary *csd* C Source Debugger for \$75.00. *csd* will dramatically reduce your development time and is an indispensable learning tool as well. You'll find more details on these products enclosed, and a convenient order card at the back of your manual.

Let us know how **Fast Forward** is working for you, and don't hesitate to call us if you have any questions.

Sincerely,

Robert Swartz
President
