<b>Introduction</b> . . . . .	1
What is Let's C? . . . . .	1
Hardware requirements . . . . .	1
Changes in release 4.0 . . . . .	1
How to use this manual . . . . .	2
User registration and reaction report . . . . .	3
Technical support. . . . .	3
Bibliography . . . . .	3
i8086/MS-DOS information. . . . .	5
<b>Installing and Running Let's C</b> . . . . .	7
Installing Let's C . . . . .	7
Installing Let's C onto a hard disk . . . . .	7
Installing Let's C onto a floppy-disk system . . . . .	8
Re-installing a portion of Let's C . . . . .	10
Setting your computer's environment. . . . .	10
Setting the PATH . . . . .	10
Finding the ccargs file . . . . .	11
Editing ccargs . . . . .	11
Using MWS, the Let's C command interface . . . . .	12
Editing a file . . . . .	13
Simple compiling . . . . .	15
Running a program. . . . .	18
Quick DOS and !DOS options. . . . .	19
Using the make programming discipline . . . . .	19
Using csd, the C source debugger . . . . .	21
Resetting the buffers . . . . .	22
Where to go from here . . . . .	25
<b>C for Beginners.</b> . . . . .	27
Programming languages and C . . . . .	27
Assembly and high-level languages . . . . .	27
So, what is C? . . . . .	28
Structured programming . . . . .	28
Compiling a C program . . . . .	29
Writing a C program . . . . .	29
A sample C programming session . . . . .	30
Designing a program . . . . .	30
The main function . . . . .	31
Opening a file and showing text . . . . .	32
Accepting file names . . . . .	34
Error checking. . . . .	35
Print a portion of a file . . . . .	37
Checking for the end of file . . . . .	39
Polling the keyboard . . . . .	40
For more information. . . . .	42
Where to go from here . . . . .	42
<b>Compiling with Let's C</b> . . . . .	43
The phases of compilation. . . . .	43
Edit errors automatically . . . . .	43
Renaming executable files . . . . .	44

## ***ii The COHERENT System***

---

Floating-point numbers . . . . .	44
Compiling multiple source files . . . . .	45
Wildcards. . . . .	45
Tailoring the command line interface . . . . .	46
Linking without compiling. . . . .	46
Compiling without linking. . . . .	47
Mini-make option . . . . .	47
Assembly-language files . . . . .	47
Changing the size of the stack . . . . .	48
i8086 memory models . . . . .	48
Debugging information. . . . .	49
i8087 programs . . . . .	49
Options passed to MS-LINK. . . . .	49
Compiling programs without STDIO . . . . .	50
Using default options. . . . .	50
Where to go from here . . . . .	51
<b>Introduction to MicroEMACS . . . . .</b>	<b>53</b>
What is MicroEMACS? . . . . .	53
Keystrokes — <ctrl>, <esc> . . . . .	53
Becoming acquainted with MicroEMACS . . . . .	53
Beginning a document . . . . .	54
Moving the Cursor . . . . .	55
Moving the cursor forward. . . . .	56
Moving the cursor backward . . . . .	56
From line to line. . . . .	56
Moving up and down by a screenful of text . . . . .	57
Moving to beginning or end of text . . . . .	57
Saving text and quitting . . . . .	57
Killing and deleting. . . . .	57
Deleting versus killing . . . . .	58
Erasing text to the right . . . . .	58
Erasing text to the left . . . . .	59
Erasing lines of text . . . . .	59
Yanking back (restoring) text . . . . .	59
Quitting . . . . .	59
Block killing and moving text . . . . .	60
Moving one line of text . . . . .	60
Multiple copying of killed text. . . . .	60
Kill and move a block of text . . . . .	60
Capitalization and other tools. . . . .	61
Capitalization and lowercasing . . . . .	61
Transpose characters. . . . .	62
Screen redraw . . . . .	62
Return indent . . . . .	62
Word wrap . . . . .	63
Search and Reverse Search . . . . .	64
Search forward . . . . .	64
Reverse search . . . . .	65
Cancel a command . . . . .	65
Search and replace . . . . .	66
Saving text and exiting. . . . .	66
Write text to a new file . . . . .	67
Save text and exit. . . . .	67

## **CONTENTS**

Advanced editing . . . . .	67
Arguments . . . . .	68
Arguments — default values . . . . .	68
Selecting values . . . . .	69
Deleting with arguments—an exception. . . . .	69
Buffers and files. . . . .	69
Definitions . . . . .	69
File and buffer commands. . . . .	70
Write and rename commands. . . . .	70
Replace text in a buffer . . . . .	70
Visiting another buffer . . . . .	71
Move text from one buffer to another . . . . .	71
Checking buffer status. . . . .	71
Renaming a buffer . . . . .	72
Delete a buffer. . . . .	72
Windows . . . . .	72
Creating windows and moving between them . . . . .	73
Enlarging and shrinking windows . . . . .	74
Displaying text within a window . . . . .	75
One buffer . . . . .	75
Multiple buffers . . . . .	76
Moving and copying text among buffers. . . . .	76
Checking buffer status. . . . .	76
Saving text from windows . . . . .	76
Keyboard macros . . . . .	77
Keyboard macro commands. . . . .	77
Replacing a macro . . . . .	77
Sending commands to MS-DOS . . . . .	77
Compiling and debugging through MicroEMACS . . . . .	78
The MicroEMACS help facility . . . . .	79
Where to go from here . . . . .	79
<b>make Programming Discipline</b> . . . . .	81
How does make work? . . . . .	81
Try make . . . . .	82
Essential make . . . . .	83
The makefile . . . . .	83
Building a simple makefile . . . . .	84
Comments and macros. . . . .	84
Setting the time . . . . .	85
Building a large program . . . . .	85
Command line options . . . . .	86
Other command line features . . . . .	86
Advanced make . . . . .	87
Default rules. . . . .	87
Double-colon target lines . . . . .	88
Alternative uses . . . . .	89
Special targets. . . . .	90
Errors. . . . .	90
Exit status . . . . .	90
Where to go from here . . . . .	90
<b>Questions and Answers.</b> . . . . .	91
Programming problems . . . . .	91
Problems with running programs . . . . .	95

Limitations in i8086 . . . . .	96	
<b>Error Messages</b> . . . . .	97	
<b>The Lexicon</b> . . . . .	115	
example. . . . .	Give an example of Mark Williams Lexicon format. . . . .	117
! . . . . .	Logical negation operator . . . . .	118
!= . . . . .	Inequality operator . . . . .	118
" . . . . .	String literal character . . . . .	118
# . . . . .	String-ize operator . . . . .	119
## . . . . .	Token-pasting operator . . . . .	120
#define . . . . .	Define an identifier as a macro . . . . .	121
#elif . . . . .	Include code conditionally. . . . .	123
#else . . . . .	Include code conditionally. . . . .	123
#endif . . . . .	End conditional inclusion of code . . . . .	124
#error . . . . .	Error directive . . . . .	124
#if . . . . .	Include code conditionally. . . . .	124
#ifdef . . . . .	Include code conditionally. . . . .	125
#ifndef . . . . .	Include code conditionally. . . . .	125
#include . . . . .	Read another file and include it . . . . .	126
#line. . . . .	Reset line number . . . . .	127
#pragma . . . . .	Perform implementation-defined task . . . . .	127
#undef . . . . .	Undefine a macro . . . . .	128
% . . . . .	Remainder operator. . . . .	128
%= . . . . .	Remainder assignment operator . . . . .	129
& . . . . .	. . . . .	129
&&. . . . .	Logical AND operator. . . . .	130
&= . . . . .	Bitwise-AND assignment operator . . . . .	130
() . . . . .	. . . . .	130
* . . . . .	. . . . .	131
*/ . . . . .	. . . . .	132
*= . . . . .	Multiplication assignment operator . . . . .	132
+ . . . . .	. . . . .	132
++ . . . . .	Increment operator . . . . .	133
+= . . . . .	Addition assignment operator. . . . .	134
, . . . . .	. . . . .	134
- . . . . .	. . . . .	135
-- . . . . .	Decrement operator. . . . .	136
-= . . . . .	Subtraction assignment operator. . . . .	136
-> . . . . .	Select a member . . . . .	136
. . . . .	Member selection . . . . .	137
/ . . . . .	Division operator . . . . .	138
/* . . . . .	. . . . .	138
/= . . . . .	Division assignment operator . . . . .	138
: . . . . .	. . . . .	139
; . . . . .	. . . . .	139
< . . . . .	Less-than operator . . . . .	139
<< . . . . .	Bitwise left-shift operator . . . . .	139
<<= . . . . .	Bitwise left-shift assignment operator . . . . .	140
<= . . . . .	Less-than or equal-to operator . . . . .	140
= . . . . .	Assignment operator . . . . .	141
== . . . . .	Equality operator . . . . .	141
> . . . . .	Greater-than operator . . . . .	142
>= . . . . .	Greater-than or equal-to operator . . . . .	142
>> . . . . .	Bitwise right-shift operator . . . . .	143

>>=	Bitwise right-shift assignment operator	144
?:	Conditional operator	144
[]	Array subscript operator	145
^	Bitwise exclusive OR operator	146
^=	Bitwise exclusive-OR assignment operator	147
__DATE__	Date of translation	147
__end__		147
__FILE__	Source file name	148
__LINE__	Current line within a source file	148
__STDC__	Mark a conforming translator	148
__TIME__	Time source file is translated	149
_exit()	Terminate a program	149
_tolower()	Convert letter to lower case	149
_toupper()	Convert letter to upper case	150
_zero()	Zero a block of memory	151
{}		151
	Bitwise inclusive OR operator	151
=	Bitwise inclusive-OR assignment operator	152
	Logical OR operator	152
~	Bitwise complement operator	153
abort()	End program immediately	154
abs()	Compute the absolute value of an integer	154
access()	Check if a file can be accessed in a given mode	155
access.h	Define manifest constants used by access()	156
access checking		157
acos()	Calculate inverse cosine	157
address		157
alias		158
alien	Name a non-standard function	158
alignment		159
arena		159
argc		160
argument		160
argv		160
array declarators		161
as	i8086 assembler	161
ASCII		177
asctime()	Convert broken-down time to text	180
asin()	Calculate inverse sine	181
assert()	Check assertion at run time	181
assert.h	Header for assertions	182
atan()	Calculate inverse tangent	182
atan2()	Calculate inverse tangent	183
atexit()	Register a function to be performed at exit	183
atof()	Convert string to floating-point number	184
atoi()	Convert string to integer	185
atol()	Convert string to long integer	185
auto	Automatic storage duration	186
aux	Logical device for serial port	186
behavior		187
BIOS		187
bios.h	Outline ROM BIOS data area	188
bit		188

bit-fields . . . . .	188
bit map . . . . .	189
block . . . . .	189
break . . . . .	Exit unconditionally from loop or switch . . . . . 190
bsearch() . . . . .	Search an array . . . . . 190
byte . . . . .	192
byte ordering . . . . .	Describe order of bytes. . . . . 192
cabs() . . . . .	Complex absolute value function. . . . . 194
calloc() . . . . .	Allocate and clear dynamic memory . . . . . 194
case . . . . .	Mark entry in switch table. . . . . 194
cc . . . . .	Compiler controller . . . . . 195
cc0 . . . . .	200
cc1 . . . . .	200
cc2 . . . . .	200
cc3 . . . . .	200
CCTAIL . . . . .	Variables at end of compilation command . . . . . 201
ceil() . . . . .	Integral ceiling. . . . . 201
char . . . . .	201
character constant . . . . .	202
character display semantics. . . . .	202
character handling . . . . .	203
clearerr() . . . . .	Clear a stream's error indicator . . . . . 204
CLK_TCK . . . . .	205
clock() . . . . .	Get processor time used . . . . . 205
clock_t . . . . .	System time . . . . . 206
close() . . . . .	Close a file . . . . . 206
cmp . . . . .	Compare bytes of two files. . . . . 207
commands . . . . .	207
comment . . . . .	208
compatible types . . . . .	208
compile . . . . .	209
compliance. . . . .	209
con . . . . .	Logical device for the console . . . . . 210
const . . . . .	Qualify an identifier as not modifiable. . . . . 210
constant expressions. . . . .	210
constants. . . . .	212
continue . . . . .	Force next iteration of a loop . . . . . 212
conversions . . . . .	213
cos() . . . . .	Calculate cosine. . . . . 215
cosh() . . . . .	Calculate hyperbolic cosine . . . . . 215
cpp . . . . .	C preprocessor . . . . . 215
creat() . . . . .	Create/truncate a file . . . . . 216
csreg() . . . . .	Get value from CS register. . . . . 216
ctime() . . . . .	Convert calendar time to text . . . . . 217
ctype.h . . . . .	Header for character-handling functions . . . . . 218
daemon . . . . .	219
date and time . . . . .	219
dayspermonth() . . . . .	Return number of days in a given month . . . . . 220
DBL_DIG . . . . .	220
decimal-point character . . . . .	220
declarations . . . . .	221
declarators. . . . .	221
default . . . . .	Default entry in switch table . . . . . 222

defined . . . . .	Check if identifier is defined. . . . .	222
definition . . . . .		223
Definitions . . . . .		223
diagnostics . . . . .		225
difftime() . . . . .	Calculate difference between two times . . . . .	225
digit . . . . .		226
directory . . . . .		226
div() . . . . .	Perform integer division . . . . .	226
div_t . . . . .	Type returned by <b>div()</b> . . . . .	227
do . . . . .	Loop construct . . . . .	227
dos.h . . . . .	Define MS-DOS functions and devices . . . . .	228
DOS-specific features . . . . .		228
double . . . . .		228
dsreg() . . . . .	Get value from DS segment register . . . . .	229
dup() . . . . .	Duplicate a file descriptor . . . . .	229
dup2() . . . . .	Duplicate a file descriptor . . . . .	229
ecvt() . . . . .	Convert floating-point numbers to strings . . . . .	231
egrep . . . . .	Extended pattern search. . . . .	231
else . . . . .	Conditionally execute a statement . . . . .	233
enum . . . . .	Enumerated data type . . . . .	234
enumeration constant . . . . .		235
environmental variable. . . . .		235
envp . . . . .	Argument passed to main . . . . .	235
EOF . . . . .	Indicate end of a file . . . . .	236
errno . . . . .	External integer that holds error status. . . . .	236
errno.h . . . . .	Define errno and error codes . . . . .	237
escape sequences . . . . .		237
esreg() . . . . .	Get value from ES segment register . . . . .	238
exargs() . . . . .	Get and parse a command line . . . . .	238
exception . . . . .		240
execall() . . . . .	Execute a subprogram . . . . .	240
executable file . . . . .		241
exit() . . . . .	Terminate a program gracefully. . . . .	241
explicit conversion . . . . .		242
extended character handling . . . . .		243
extended time . . . . .		243
extern . . . . .	External linkage. . . . .	244
external definitions . . . . .		244
external name . . . . .		244
fabs() . . . . .	Compute absolute value . . . . .	246
false . . . . .		246
fclose() . . . . .	Close a stream. . . . .	246
fcvt() . . . . .	Convert floating-point numbers to strings . . . . .	247
fdopen() . . . . .	Open a stream for standard I/O . . . . .	247
feof() . . . . .	Examine a stream's end-of-file indicator . . . . .	248
ferror() . . . . .	Examine a stream's error indicator . . . . .	249
fflush() . . . . .	Flush output stream's buffer . . . . .	250
fgetc() . . . . .	Read a character from a stream . . . . .	250
fgetpos() . . . . .	Get value of file-position indicator . . . . .	251
fgets() . . . . .	Read a line from a stream . . . . .	252
fgetw() . . . . .	Read integer from stream . . . . .	253
field . . . . .		254
file . . . . .		255

file descriptor	256
FILENAME_MAX	Maximum length of file name . . . . . 256
fileno()	Get file descriptor . . . . . 256
float	257
float.h	260
floating constant	262
floor()	Numeric floor . . . . . 262
fmod	Calculate modulus for floating-point number . . . . . 263
fopen()	Open a stream for standard I/O . . . . . 263
for	Loop construct . . . . . 265
fpos_t	Encode current position in a file . . . . . 265
fprintf()	Print formatted text into a stream . . . . . 266
fputc()	Write a character into a stream. . . . . 267
fputs()	Write a string into a stream. . . . . 268
fputw()	Write an integer to a stream. . . . . 268
fread()	Read data from a stream. . . . . 268
free()	Deallocate dynamic memory . . . . . 269
freopen()	Re-open a stream . . . . . 270
frexp()	Fracture floating-point number. . . . . 271
fscanf()	Read and interpret text from a stream. . . . . 271
fseek()	Set file-position indicator . . . . . 273
fsetpos()	Set file-position indicator . . . . . 274
ftell()	Get value of file-position indicator . . . . . 275
function	275
function call	276
function declarators	282
function definition	282
function designator	283
function prototype	283
fwrite()	Write data into a stream. . . . . 285
gcvt()	Convert floating-point numbers to strings . . . . . 286
general utilities	286
getc()	Read a character from a stream . . . . . 287
getchar()	Read a character from the standard input stream. . . . . 287
getenv()	Read environmental variable . . . . . 288
gets()	Read a string from the standard input stream . . . . . 289
getw()	Read word from file stream . . . . . 290
gmtime()	Convert calendar time to universal coordinated time . . . . . 290
goto	Unconditionally jump within a function. . . . . 291
header	293
header names	294
hypot()	Compute hypotenuse of right triangle . . . . . 294
i8086 support	295
i8087	Floating-point co-processor . . . . . 295
identifiers	296
if	Conditionally execute an expression. . . . . 297
implicit conversions	298
inb()	Read from a port . . . . . 298
INCDIR	Directory that holds include files. . . . . 298
index()	Find a character in a string . . . . . 299
initialization	299
int	302
intcall()	Call MS-DOS interrupt. . . . . 303

integer constant . . . . .	304
internal name . . . . .	305
interrupt . . . . .	305
isalnum() . . . . .	Check if a character is a numeral or letter . . . . . 305
isalpha() . . . . .	Check if a character is a letter . . . . . 306
isascii() . . . . .	Check if a character is an ASCII character . . . . . 306
iscntrl() . . . . .	Check if a character is a control character . . . . . 306
isdigit() . . . . .	Check if a character is a numeral . . . . . 307
isgraph() . . . . .	Check if a character is printable . . . . . 307
islower() . . . . .	Check if a character is a lower-case letter. . . . . 307
isprint() . . . . .	Check if a character is printable . . . . . 308
ispunct() . . . . .	Check if a character is a punctuation mark . . . . . 308
isspace() . . . . .	Check if character is white space. . . . . 309
isupper() . . . . .	Check if a character is an upper-case letter . . . . . 309
isxdigit() . . . . .	Check if a character is a hexadecimal numeral . . . . . 310
j0() . . . . .	Compute Bessel function . . . . . 311
j1() . . . . .	Compute Bessel function . . . . . 312
jday_to_time() . . . . .	Convert Julian date to system time . . . . . 312
jday_to_tm() . . . . .	Convert Julian date to system calendar format . . . . . 312
jmp_buf . . . . .	Type used with non-local jumps . . . . . 313
jn() . . . . .	Compute Bessel function . . . . . 313
keywords . . . . .	315
label . . . . .	316
labs() . . . . .	Compute the absolute value of a long integer . . . . . 316
Language . . . . .	316
LARGE model . . . . .	Intel multi-segment memory model . . . . . 319
LC_ALL . . . . .	All locale information. . . . . 319
LC_COLLATE . . . . .	Locale collation information. . . . . 320
LC_CTYPE . . . . .	Locale character-handling information . . . . . 321
LC_MONETARY . . . . .	Locale monetary information . . . . . 321
LC_NUMERIC . . . . .	Locale numeric information. . . . . 321
LC_TIME . . . . .	Locale time information . . . . . 322
lconv . . . . .	Hold monetary conversion information . . . . . 322
ldexp() . . . . .	Load floating-point number . . . . . 324
ldiv() . . . . .	Perform long integer division . . . . . 325
ldiv_t . . . . .	Type returned by ldiv() . . . . . 325
lexical elements . . . . .	326
Lexicon . . . . .	326
libcxs87.lib . . . . .	Standard library, SMALL model/i8087 only . . . . . 327
libm . . . . .	327
LIBPATH . . . . .	Directories that hold libraries. . . . . 327
limits.h . . . . .	328
link . . . . .	329
linkage . . . . .	329
locale.h . . . . .	Localization functions and macros. . . . . 330
localeconv() . . . . .	Initialize <b>lconv</b> structure . . . . . 331
localization . . . . .	331
localtime() . . . . .	Convert calendar time to local time . . . . . 334
log() . . . . .	Compute natural logarithm . . . . . 335
log10() . . . . .	Compute common logarithm . . . . . 336
long double . . . . .	336
long int . . . . .	337
longjmp() . . . . .	Execute a non-local jump . . . . . 337

lseek()	Set read/write position.	338
lvalue		339
main		341
main	Introduce program's main function	341
make	Program building discipline	342
malloc()	Allocate dynamic memory	345
manifest constant		345
math.h	Header for mathematics functions	346
mathematics		346
maxmem		347
mblen()	Return length of a string of multibyte characters	347
mbstowcs()	Convert sequence of multibyte characters to wide characters	348
mbtowc()	Convert a multibyte character to a wide character	348
me	MicroEMACS screen editor	349
member		355
memchr()	Search a region of memory for a character	356
memcmp()	Compare two regions	357
memcpy()	Copy one region of memory into another	358
memmove()	Copy region of memory into area it overlaps	359
memset()	Fill an area with a character	360
mktemp()	Generate a temporary file name	360
mktime()	Turn broken-down time into calendar time	361
model		362
modf()	Separate floating-point number	362
mtype.h	List processor code numbers	363
multibyte characters		363
name space		366
nested comments		367
nm	Print a program's symbol table	367
nondigit		368
non-local jumps		368
notmem()	Check if memory is allocated	369
null directive	Directive that does nothing	369
null pointer constant		369
null statement		370
numerical limits		370
nybble		370
object		371
object definition		371
object format		372
object types		372
obsolescent		372
open()	Open a file	372
operating system devices	Logical devices for system peripherals	374
operators		374
ordinary identifier		375
outb()	Write to a port	376
parameter		377
PATH	Directories that hold executable files	377
path()	Build a path name for a file	377
path.h	Declare path()	378
pattern		379
peek()	Extract a word from memory	379

peekb()	Extract a byte from memory.	379
perror()	Write error message into standard error stream.	380
picture()	Format numbers under mask.	381
pnmatch()	Match string pattern.	382
pointer		383
pointer declarators		386
poke()	Insert a word into memory.	386
pokeb()	Insert a byte into memory.	387
port		387
portability		387
pow()	Raise one number to the power of another.	388
pr	Paginate and print files.	389
preprocessing numbers		389
printf()	Format and print text into the standard output stream.	390
prn	MS-DOS logical device for parallel port.	396
process		397
program startup.		397
program termination		397
pun		397
punctuators		398
putc()	Write a character into a stream.	398
putchar()	Write a character into the standard output stream.	399
puts()	Write a string into the standard output stream.	400
putw()	Write word to stream.	400
qsort()	Sort an array.	402
raise()	Send a signal.	403
rand()	Generate pseudo-random numbers.	404
random access.		405
read()	Read from a file.	405
read-only memory.		406
realloc()	Reallocate dynamic memory.	406
record.		407
register	Quick access required.	407
register		408
remove()	Remove a file.	408
rename()	Rename a file.	409
return.	Return to calling function.	409
rewind()	Reset file-position indicator.	410
rindex()	Find a character in a string.	411
runtime startup.		411
rvalue.		412
sbrk()	Increase a program's data space.	413
scanf()	Read and interpret text from standard input stream.	413
scope		416
sequence point		418
setbuf()	Set alternative stream buffer.	418
setjmp()	Save environment for non-local jump.	419
setjmp.h	Declarations for non-local jump.	419
setlocale()	Set or query a program's locale.	420
setvbuf()	Set alternative stream buffer.	421
shellsort()	Sort arrays in memory.	422
short int		422
side effect.		423

sig_atomic_t . . . . .	Type that can be updated despite signals . . . . .	423
signal() . . . . .	Set processing for a signal. . . . .	423
signal.h . . . . .	Signal-handling routines . . . . .	424
signal handling . . . . .		425
signals/interrupts . . . . .		426
signed . . . . .		431
signed char . . . . .		432
sin() . . . . .	Calculate sine . . . . .	432
sinh() . . . . .	Calculate hyperbolic sine . . . . .	433
size . . . . .	Print the size of an object module . . . . .	433
sizeof . . . . .		434
SMALL model . . . . .	Intel single-segment memory model . . . . .	434
source file . . . . .		435
sprintf() . . . . .	Print formatted text into a string . . . . .	435
sqrt() . . . . .	Calculate the square root of a number . . . . .	436
srand() . . . . .	Seed pseudo-random number generator . . . . .	437
sscanf() . . . . .	Read and interpret text from a string . . . . .	438
stack . . . . .		440
Standard . . . . .		440
standard error . . . . .		440
standard input . . . . .		441
standard output . . . . .		441
stat() . . . . .	Find file attributes . . . . .	441
stat.h . . . . .	Definitions and declarations to obtain file status . . . . .	443
statements . . . . .		443
static . . . . .	Internal linkage . . . . .	444
stdarg.h . . . . .	Header for variable numbers of arguments . . . . .	444
stderr . . . . .	Pointer to standard error stream . . . . .	444
stdin . . . . .	Pointer to standard input stream. . . . .	445
STDIO . . . . .	Standard input and output . . . . .	445
stdio.h . . . . .	Declarations and definitions for STDIO . . . . .	447
stdlib.h . . . . .	General utilities . . . . .	447
stdout . . . . .	Pointer to standard output stream. . . . .	449
stime() . . . . .	Set the operating system time . . . . .	449
storage-class specifiers . . . . .		450
storage duration . . . . .		450
strcat() . . . . .	Append one string onto another . . . . .	451
strchr() . . . . .	Find a character in a string . . . . .	451
strcmp() . . . . .	Compare two strings . . . . .	453
strcoll() . . . . .	Compare two strings, using locale-specific information. . . . .	453
strcpy() . . . . .	Copy one string into another . . . . .	454
strcspn() . . . . .	Return length a string excludes characters in another . . . . .	454
stream . . . . .		455
strerror() . . . . .	Translate an error number into a string. . . . .	456
strftime() . . . . .	Format locale-specific time . . . . .	457
string.h . . . . .		458
string handling . . . . .		459
string literal . . . . .		460
strip . . . . .	Strip debug table from executable file . . . . .	460
strlen() . . . . .	Measure the length of a string . . . . .	461
strncat() . . . . .	Append <i>n</i> characters of one string onto another . . . . .	461
strncmp() . . . . .	Compare one string with a portion of another . . . . .	462
strncpy() . . . . .	Copy one string into another . . . . .	463

strpbrk()	Find first occurrence of a character from another string . . . .	465
strrchr()	Search for rightmost occurrence of a character in a string. . .	466
strspn()	Return length a string includes characters in another . . . . .	467
strstr()	Find one string within another . . . . .	468
strtod()	Convert string to floating-point number. . . . .	469
strtok()	Break a string into tokens. . . . .	470
strtol()	Convert string to long integer. . . . .	471
strtoul()	Convert string to unsigned long integer. . . . .	472
struct	. . . . .	474
strxfrm()	Transform a string . . . . .	475
swab()	Swap a pair of bytes . . . . .	475
switch	Select an entry in a table . . . . .	476
system()	Suspend a program and execute another . . . . .	477
tag	. . . . .	478
tail	Print the end of a file . . . . .	478
tan()	Calculate tangent. . . . .	478
tanh()	Calculate hyperbolic tangent . . . . .	479
technical information	. . . . .	479
tempnam()	Generate a unique name for a temporary file. . . . .	479
time()	Get current calendar time . . . . .	480
time	Print current time/Time execution of a command. . . . .	480
time.h	Header for date and time . . . . .	481
time_t	Calendar time . . . . .	481
time_to_jday()	Convert system time to Julian date . . . . .	482
TIMEZONE	Time zone information . . . . .	482
tm	Encode broken-down time. . . . .	484
tm_to_jday()	Convert calendar format to Julian time . . . . .	484
TMPDIR	Directory that holds temporary files . . . . .	485
tmpfile()	Create a temporary file. . . . .	485
tmpnam()	Generate a unique name for a temporary file. . . . .	488
toascii()	Convert characters to ASCII. . . . .	489
token	. . . . .	490
tolower()	Convert character to lower case . . . . .	491
toupper()	Convert character to upper case . . . . .	492
translation unit	. . . . .	493
trigraph sequences	. . . . .	493
true	. . . . .	494
typedef	Synonym for another type. . . . .	494
type qualifier	. . . . .	494
types	. . . . .	495
type specifier	. . . . .	498
ungetc()	Push a character back into the input stream. . . . .	500
union	. . . . .	501
universal coordinated time	. . . . .	502
unlink()	Remove a file. . . . .	503
unsigned	. . . . .	504
unsigned char	. . . . .	504
unsigned int	. . . . .	504
unsigned long int	. . . . .	505
unsigned short int	. . . . .	505
va_arg()	Return pointer to next argument in argument list. . . . .	506
va_end()	Tidy up after traversal of argument list . . . . .	506
va_list	Type used to handle argument lists of variable length . . . . .	507

## ***xiv The COHERENT System***

---

va_start()	Point to beginning of argument list	507
value preserving.		508
variable arguments		508
vfprintf()	Print formatted text into stream	509
void	Empty type.	511
void expression		513
volatile	Qualify an identifier as frequently changing	513
vprintf()	Print formatted text into standard output stream	513
vsprintf()	Print formatted text into string	514
wc	Count words, lines, and characters in files	516
wcstombs()	Convert sequence of wide characters to multibyte characters	516
wctomb()	Convert a wide character to a multibyte character	517
while	Loop construct	517
wildcards.		518
write()	Write into a file	518
xctype.h		519
XOFF		519
XON.		519
xtime.h		519
<b>Appendix</b>		<b>521</b>
