LET'S C $75.00

Intrigued by the idea of programming in C? Let's C is a complete, high-quality C compiler which compiles fast and produces fast, compact code. PC TECH JOURNAL says "The performance and documentation of the $75 Let's C compiler rival those of C compilers currently being sold for $500...(August 1986)." For IBM and compatibles.

CSD C SOURCE DEBUGGER $75.00

Once you've written your Let's C programs, you'll want the CSD C Source Debugger to help you get them running. CSD lets you look directly at your source code as you debug. That's a big help for novices, and a real time-saver for experienced programmers. BYTE magazine writes, "CSD is close to the ideal debugging environment...(August 1986)." For IBM and compatibles.

MARK WILLIAMS C FOR THE ATARI ST $179.95

If you're programming in C on an Atari ST, this is the C compiler for you. It's faster than ever, and includes a symbolic debugger, an integrated editor, and even a RAM disk. ANALOG COMPUTING called it "the all-around best choice for serious software development on the ST." Over a hundred sample programs make it ideal for novices, too.

COHERENT $495.00

A UNIX-compatible, multi-user, multi-tasking operating system for IBM PCs and compatibles.
