who are in a position to give authori-tative advice as well as with men thor-oughly familiar with the details of the Spring Valley water company's plant. Neither side is in a position to give out the figures of the proposed deal before the subcommittee has rendered its report and the matter considered in the whole body. It is believed, how-ever, that a satisfactory agreement can be reached.

It is known that the company will not be averse to letting the city ac-quire the plant, and the proposition re-solves itself into a question of terms. The appraisement of the value of the plant will be made under existing con-ditions and any improvements added for the immediate efficient service to the city will be made with the knowl-edge and approval of the federated committee. The cost will be added at a fair valuation to the purchase price. The plan of the committee for the ac-quisition and successful operation by the city of the Spring Valley water company's plant in no way interferes with the ultimate aim of the commit-tee, which is the installation of the Slerra water supply.

Agents to Ask Supervisors for Right to Operate in Few Weeks

A syndicate composed of New York and San Francisco capitalists within the next few weeks will make an application to the board of supervisors for a franchise for a system of electric street railways. The concern will enter the local field as a rival to the United Railroads. In the syndicate are Leopold Michels, the Meyersteins and the Brandensteins of San Francisco and a coterie of New York millionaires repre-sented by Leopold Wallach. The enter-prist is being financed through the Knickerbocker trust company of New York and many millions of capital are

porarily. Before taking up the matter again the New York capitalists sent their representatives to San Francisco to study conditions here. These agents reported that the traffic was heavier than before the disaster and that the existing streetcar facilities—were en-tirely inadequate for a city of the size of San Francisco. It was then that en-gineers were called in and asked to estimate the cost of the projected sys-tem. All data are now in the hands of the financiers.
